

Program: Earn and Learn

Advisor: Mr. Rosmarin

Throughout my academic career, it has been difficult to find the right motivation to succeed in school. I already know that everyone needs a good education in order to find a well-paying job. Beyond money, I know that if I continue to do well in school I will eventually see my goals and dreams through to their completion, and that is a reward that I am looking forward to achieving in the future. I think that Mr. Rosmarin's "Earn and Learn" program has definitely helped to point me in the right direction by helping me to maintain my grades and allowing me to discuss my classes in weekly meetings. His program has also helped to encourage me to stay on the right path and keep my head in the books. The actual amount of money involved is trivial because I've gotten so used to the program that it has become something like a ritual or routine. Before I became a part of the program, I was a low C student that was having trouble in several classes.

Through "Earn and Learn" I have been able to see my commitment and dedication pay off because my grades have improved and are now in the high B's. I am relieved to say that my average at school has been consistent and a burden is lifted every term because I am never surprised by my grades at the end of each semester. In fact, the weekly progress reports let me know exactly how I am doing in a particular class and where I need to improve. I would even go as far as to recommend this program to any student who is having a rough time in school because "Earn and Learn" motivates students and encourages them to achieve all of their scholastic goals.
